Subject: RE: PWS definition from ODEQ

Hi Betsey,

My apologies for the delay, we wanted to make sure our attorney had a chance to look over the proposed changes. We have reviewed the proposed language for the PWS definition and approve the changes. Please let us know if there is anything else DEQ needs from EPA regarding presenting these changes to the board.
Thanks & Have a Great Day!

Nichole

**Subject:** PWS definition

Jim –

Thanks for taking my call today. Here is the proposed language I was talking about. Let me know your thoughts. Our notice of rulemaking gets published by December 1, so DEQ would like to have something finalized by then.

This is the language DEQ would like to take to our board for approval:

**"Public Water Supply (PWS) system"** means any system providing water for human consumption, through pipes or other constructed conveyances, if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days per year, whether receiving payment or not. Multi-family dwellings, which are constructed, inspected, and maintained under a State or locally approved plumbing code and purchase water from a permitted water system, are not classified as a Public Water Supply system. The following are the categories of Public Water Supply systems:

This is the language that matches the federal definition that Blake and I had previously discussed:

**"Public Water Supply (PWS) system"** means a system for the provision to the public of water for human consumption through pipes or other constructed conveyances, if such system has at least 15 service connections or regularly serves an average of at least 25 individuals at least sixty days per year, whether receiving payment for same or not. Multi-family dwellings, which are constructed, inspected, and maintained under State Health Department-approved plumbing code, purchase water from a permitted water system, do not provide treatment, and do not resell water, are not classified as a Public Water Supply system. The following are the categories of Public Water Supply systems:

Thanks for your time, I look forward to hearing from you.
